

EDUCATION

Carnegie Mellon University

GPA: 3.43/4.0 | May 2020

B.S. in Statistics

minor in human-computer interaction

concentration in computer science

RELEVANT COURSEWORK

COMPUTER SCIENCE

Machine Learning

Algorithms and Data Structures

Fundamentals of Programming

Software Construction

Web Prototyping

Imperative Programming

Interaction Design

Data Mining

Data Visualization (d3.js/Tableau)

STATISTICS / MATH

Probability Theory

Discrete Math

Linear Algebra

Statistical Inference

Statistical Visualization (ggplot2)

Modern Regression

Introduction to Data Science

Statistical Computing

Multivariable Calculus

Statistical Methods

SKILLS

LANGUAGES

Python, Java, Javascript, C (familiar), R, SQL

TOOLS & FRAMEWORKS

Git, React, Django, d3.js, HTML/CSS, Shiny, ggplot2, openCV, numpy, JUnit, Spring Boot, Material-UI

DESIGN & PRODUCTION

Figma, InVision

EXPERIENCE – INDUSTRY

LendingClub

software engineer

- tbd

san francisco, ca

july 2020 – present

Capital One

software engineer intern

mclean, va

june – aug 2019

- Developed data dashboard with React and d3.js to visualize 100+ million customer records and to evaluate overall data pipeline health.
- Implemented real time tracking and logging of customer information files from different lines of businesses.
- Built RESTful API with Spring Boot to abstract querying from Spark log files and core customer databases.

ASTM International

technical intern

conshohocken, pa

may – aug 2018

- Designed and improved UI for in-house statistical reporting software with Bootstrap and Material design.
- Developed software to parse databases and classify thousands of users with hierarchical clustering algorithms.
- Extracted and cleansed data for hundreds of client samples to construct a pipeline for data analysis and visualization with external R scripts.

Digital Media Academy

curriculum developer / instructor

cambridge, ma

may – aug 2017

- Lead instructor for iOS development, Game Design, and Advanced Java.
- Led team of 3 to devise and revamp curriculum for advanced Java Course.

ACTIVITIES

Computing for Good

student developer

- Collaborated with local hospitals and UPMC to create applications to detect abnormal body behavior through body-worn sensors.
- Developed software to recognize atypical changes in human position and behavior in crowds with computer vision and time series anomaly detection.
- Analyzed thousands of 911 operator calls with natural language processing to improve location transmissions to EMS.

PROJECTS

Schedulize | python, pandas, sci-kit learn, pygame

- Recommender system for course suggestions based on a student's academic record. Awarded Best Design Hack Winner at HackCMU.
